# PRESSEMEDDELELSE – AppViewX and TRUSTZONE Partner to Deliver Leading Enterprise Certificate Lifecycle Management Automation into the Scandinavian Market

Pressemeddelelse · Telekommunikation og IT

***New Partnership will bring AppViewX products into TRUSTZONE's large portfolio of customers and enable revenue growth***.

February 20, 2023, AppViewX and TRUSTZONE announced today that both companies have entered into a partnership to expand the AppViewX portfolio of automated certificate and PKI

management products into the Scandinavian market. This partnership will allow TRUSTZONE to offer its customer advanced enterprise PKI solutions for strong user, machine, application and IoT encryption and authentication.

“We are excited about this partnership as TRUSTZONE has a great reputation as a trusted and leading provider of scalable PKI solutions throughout Scandinavia,” stated Prabhakar Manickam, CRO at AppViewX. “Our certificate lifecycle management and PKI-as-a-Service solutions will further enhance TRUSTZONE’s PKI and IoT offerings to deliver more value to its customer base and grow new revenue opportunities.”

AppViewX provides an application-centric identity and access management (IAM) platform that enables self-service workflow automation and orchestration to continuously ensure application access and availability, identity-first security, and compliance control.

As part of The AppViewX Platform, the company’s CERT+ (certificate lifecycle management) and PKI+ (PKI-as-a-Service) products work together to automate the provisioning and management of digital identities (public and private trust certificates) at scale for users, machines, applications, and IoT devices across hybrid multi-cloud enterprise environments.

**QUOTE**

***We are thrilled to be working with AppViewX in the field of certificate lifecycle management, a natural next step for many of our customers and us as a provider of PKI solutions. States Henrik Dürr, co-founder of TRUSTZONE. For almost two decades, we’ve advised companies on using various PKI solutions, and we’re excited to introduce CERT+ from AppViewX next. A solution that is the obvious choice for larger companies that want to optimize and simplify the handling of digital certificates.***

## About AppViewX

AppViewX is trusted by the world’s leading global organizations to reduce risk, ensure compliance, and increase visibility through machine identity management and application infrastructure security and orchestration. With speed and agility, our Automation Platform facilitates digital transformation through streamlined workflows to prevent outages, reduce security incidents and protect both your reputation and your bottom line.

The AppViewX Platform is a modular software application that enables the automation and orchestration of network infrastructure using an intuitive, context-aware, visual workflow. It quickly and easily translates business requirements into automation workflows that improve agility, enforce compliance, eliminate errors, and reduce cost.

AppViewX automates NetOps, SecOps, and DevOps for Fortune 1000 companies, including six of the top ten global commercial banks, five of the top ten global media companies, and five of the top ten managed healthcare providers. AppViewX is headquartered in New York with additional offices in the U.K., Australia and three development centers of excellence in India.

## About TRUSTZONE

TRUSTZONE is Scandinavia's largest SSL/TLS certificate supplier and a leading provider of scalable PKI and IoT solutions for encryption, authentication, and automated certificate lifecycle management.

We offer custom options for companies and organizations across industries with a full suite of compatibility-optimized, fully scalable certificate products and solutions.

Our options fit all company sizes — from small, one-person businesses and startups needing one or two SSL/TLS certificates to large international companies looking for full-scale, enterprise-grade solutions.

We have more than 16 years of experience with PKI, SSL/TLS, and certificate management. 3,000+ companies of all sizes have already trusted us with their certificates, and more than 80% of the Danish banking sector is protected by TRUSTZONE certificates.
